Art Unit: 2836

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 49-54 and 56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Slade et al.

Note the use of rails A and B in which each rail is energized by at least the AC PDU(s) and battery(ies) depending upon the selection of the POS1/2 switch. As seen in Figure 1, in POS2 the RAIL A is supplied by 10,11,18,19 and RAIL B is supplied by 12,13,20,21, in which the loads are supplied by both the batteries and the bulk supplies (from the rectified AC input). Obviously, sharing between the input AC at 9 and the input DC at 18-21 occurs at the RAILS A,B. Since more than one battery is shown to supply each rail, one of the two batteries can be construed to be a backup battery in case all other supplies have failed. What is lacking is battery charging. The examiner takes official notice that battery charging is well known in the art of UPS systems, and thus to outfit Slade et al. with battery chargers is deemed to be obvious subject matter within the level of ordinary skill in the art. As far as the remainder of the loads and sources are concerned, the examiner takes official notice that such are well known in the art. Note that in the absence of the AC at 9, the wiring combines the batteries to supply the appropriate RAIL.

3. Applicant's election without traverse of claims 49-54,56 in Paper No. 33 is acknowledged.

Art Unit: 2836

4. Applicant's arguments with respect to claims 49-54,56 have been considered but are moot in view of the new ground(s) of rejection.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

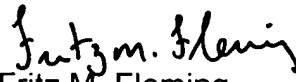

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
